About **UH Engineering**

Uthpala Nanayakkara
Director | Electrical Engineer

We believe **reliability** is the key to a great partnership.

Our foremost objective is to provide quality and reliable service in the electrical world. We have been fortunate enough to put UH Engineering footprint across the nation, with the support of reputed government and corporate organizations, who have put their trust in us. We continue to excel in the quality and value we generate for our reputed clients. I am thankful to everyone who was with us and will be with us in the future, in this journey of providing solutions for the nation.

Client's Objectives are always on the top of our Objectives

Heartfelt gratitude is extended to you for the trust you have placed in us so far. We assure our continuous commitment to those who seek our professional assistance to accomplish their goals. We believe continuous attention to sharpen our expertise through experience is what brings the best value for money and of course to bring excellent client service at every opportunity.

Hirosha Karunanayake
Director Admin & Finance

UH Engineering

Solutions for the Nation

Our Vision

To be the best engineering solution provider in the Island. Being best means, providing excellent service quality, outstanding technical expertise and absolute value for money

Our Mission

Continuously expanding the horizons of our technical expertise and understanding our customers better to ensure above standards satisfaction.

Our Values

Striving for Service excellence

We exist and envision our growth, by always determined to provide our 100% and beyond.

Assuring Accountability

Trust and confidence are the wealth we earn from customers. Without accountability we have nothing.

Collaboration and Teamwork

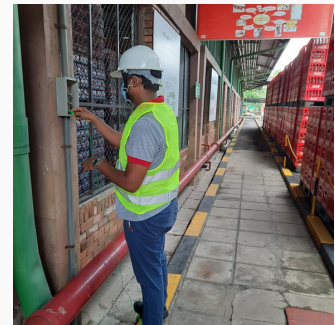

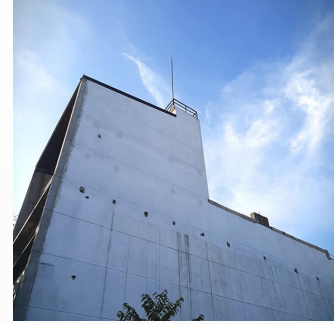

We believe in miracles, but without teamwork greatness does not occur

Our Services

Lightning & Surge Protection

An increasingly worrying reason for machine downtime, and the loss of time and revenue in your factory, occurs as a result of surges. A surge happens either from a lightning strike (direct or indirect) or when large inductive loads are switched within buildings. In essence, surges can be extremely damaging for your equipment and your productivity, and getting reliable protection against such risks is essential to stay ahead of the game. Effective lightning and surge protection can entirely prevent the loss of data and revenue that could otherwise occur as a result of these freak incidents.

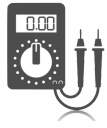

Electrical Equipments

UH Engineering is in the electrical equipment industry to service a wide range of clients and of course to make profits, which is why we will ensure we go all the way to make available a wide range of electrical equipment from top manufacturing brands.

- Wiring
- Lighting fixtures and light bulbs
- Relay and industrial controls
- Switchgear and switchboard apparatus
- Power and distribution transformers
- Other electrical equipment.

Electrical Services

**Industrial Wiring
& Panel Board
Installation**

**Chartered Electrical
Inspection**

**Certification of
all kinds of
electrical works**

**Underground
& overhead
Power Cable
Laying &
Termination**

Protective Equipments

PPE, Personal Protective Equipment, are the tools that ensure the basic health protection and safety of users. PPE is any device or appliance designed to be worn by an individual when exposed to one or more health and safety hazards. PPE includes all clothing and other work accessories designed to create a barrier against workplace hazards, and using PPE requires hazard awareness and training on the part of the user. Employees must be aware that the equipment does not eliminate the hazard; if the equipment fails, exposure will occur.
